

Gas Processors Association - Europe

CALL FOR PAPERS

For Annual Conference – May 2012

May 23 – 25, 2012 – Annual Conference – Berlin, Germany

GPA Europe is pleased to hold its Annual Conference for 2012 at the centre of Europe in the Hotel Palace in Berlin-Charlottenburg. By tradition the Annual Conference is an open theme conference and the GPA Europe welcomes offers of papers for presentation during the Technical Meeting.

Delegates will be particularly interested in case histories and operating experience as well as new concepts and technologies, but offers of papers on any subject associated with Natural Gas Processing from well-head to consumer are welcomed.

The main Technical Meeting will be held of 24 May but Knowledge Sessions are also welcomed.

The GPA is also supporting a Master Class for Younger Engineers on 23 May when the subject will be Acid Gas Removal from Natural Gas and your suggestions are welcomed

The Annual Conference is generally the best attended conference in the GPA Europe calendar and presenters can be assured of an audience with wide-ranging interests many of whom have specification influence.

In addition, the conference will include the usual networking opportunities - Welcome Reception and Conference Dinner, and delegates and presenters are encouraged to bring companions for whom a dedicated day long tour will be arranged whilst the conference is in progress.

The conference, to be held in the Hotel Palace in Berlin (www.palace.de), one of the Leading Hotels of the World, provides an excellent opportunity for contributors to provide cutting edge technical commentary and solutions.

Contributions in the form of a Title and a brief Abstract (100 . 200 words), should be sent to admin@gpaeurope.com by 31 January 2012.

So why not consider the benefits of communicating the advantages of your technology or information about your facilities to the cream of the European natural gas industry as well as spending a few days in the most beautiful and historic city of Berlin?

All submitted papers will be reviewed by the Programme Committee. Paper selections will be advised in good time to enable preparation of the paper. Guidelines for the preparation of your paper and accompanying presentation are given in our information document Guidelines for Authors, which can be downloaded from the GPA Europe website (www.gpaeurope.com).
